

A-226

Food Processing Cleaner

Chlor Clean

Application

A-226 Chlor Clean is a highly concentrated alkaline food plant cleaner that is effective against multiple soils, especially proteins. A-226 contains a unique surfactant not only breaks the bond between soils and surfaces, but offers a tight company of small foamy bubbles for a more complete penetration of soils.

Advantages

- A Concentrated blend of Caustic Alkalis, Sodium Hypochlorite and a superior vertical clinging Surfactant.
- Initial Sodium Hypochlorite content is 2.5% which aids in the cleaning and sanitation process.
- Very effective at all washing temperatures.
- Removes Protein soil deposits.
- Contains High foaming surfactants for use where more dwell is required to break up stubborn soils.
- The surfactant system creates a reduced solution surface tension that results in a better cleaning and more thorough rinsing.

Product Utilization

- Recommended for many institutional cleaning applications where a heavy duty cleaner is required.
- Washing food processing equipment and food contact surfaces.
- Washing food stains from floors and walls surfaces

Directions

Dilute 1 part A-226 CHLOR CLEAN with up to 80 parts water. Spray or foam on surface to be cleaned. The most effective dilution will depend on the surface to be cleaned, type of soil to be removed, water quality and temperature. Allow solution to remain on the surface to emulsify and loosen soil. Rinse with potable water.

Product Data

- Product # A-226
- Color: Clear Faint Yellow
- pH: 14
- Odor: Slight Chlorine
- DOT Class: Corrosive 8

Special Reminders

CORROSIVE!! Wear Safety Gear.
Do not pour into improper or unlabeled containers.

Limitations and Handling

- **Keep it away from children!**
- For Industrial use only!
- Material Safety Data Sheets are available in compliance with the worker's "Right To Know Law"
- If the msds is not available, call 1-800-456-4743 for a replacement.
